

The Advantages are Clear

Convenience of a Disposable.....but Without the Waste.

The OREX™ advantage is clear. The protective clothing paradigm is shifting dramatically in the U.S. and OREX is leading the way. Over 75% of the U.S. power plants have switched to OREX protective clothing and accessories in the past five years and more plants are getting on board each outage season. OREX value speaks for itself. OREX is not just another low tech, cheap “disposable” product. Disposables are generic, mass produced and have been available for years. Nothing new or creative about them. OREX products are part of a phenomenal, leading-edge technology package that is sweeping the nuclear industry.

OREX users are looking out for the future of their industry. They embrace new technologies which benefit the industry and they have vision. OREX users understand that Radwaste minimization is not only a key responsibility of all of us but it is vital to the future of the industry. Nuclear energy is “clean” and future generations rely on us to keep it that way. OREX is better for you, your workers and the environment.

OREX begins with the end in mind, coupling superior front-end field performance with unparalleled back-end waste minimization. Following use, “disposables” must be tracked as radioactive waste, resulting in significant increases in generated waste volumes. OREX processing after use requires no waste tracking no waste is reported to the generator.

When you put on OREX...you are wearing the future.

Protective Clothing Comparisons			
	Laundrables	Disposables	OREX
Reduces Radwaste	●		●
Reduces Personnel Contaminations		●	●
Superior Breathability and Comfort			●
Proven Strength and Durability	●		●
Zero Shipment Outages		●	●
Light Weight (< lifting injuries)		●	●
Pre-Outage Delivery on All Dressouts		●	●
Onsite Technical Support			●
Plastic Zippers (< FME Concerns)			●
Double-Sleeve Design (No cuff sealers required)			●
Elastic Wrists and Ankles		●	●
In-Stock Inventories >500,000 dressouts			●
Broad Range of “Like” Products/Accessories			●
